

Ultimate Residue Management and Nutrient Release

NGest Dry accelerates the degradation of crop residue using a microbial package paired with AMS, creating an ideal environment for residue breakdown and nutrient release.

Features & Benefits

-  Industry leading microbial package with fungi to accelerate crop residue breakdown
-  Improves plantability and uniform crop emergence
-  Beneficial bacteria and fungi designed to break down crop residue and cycle nutrients for uptake
-  AMS provides readily available N source creating favorable C to N ratio for microbes to break down residue and mineralize nutrients
-  Novel technology that speeds germination of Bacillus spores for faster acceleration of crop residue breakdown and nutrient release even under stress

Directions for Use

Tank mix Ngest Dry with water using an amount of at least 10 gallons per acre. If using more than 10 gallons of water per acre it is recommended that you apply additional AMS to the tank mix by following the AMS product manufacturer's Directions for Use. Do not exceed the maximum amount of product per acre for any tank mix partner used with Ngest Dry. Mix only enough for the immediate application. DO NOT mix product with bactericides or copper compounds.

To mix, fill spray tank half way full of desired water amount and begin agitation. Add products in this order (mixing thoroughly after each addition): Ngest Dry, adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application, especially for high phosphate and alkaline (pH > 7) solutions.

Use Rate:

Apply 8.0 oz/ac with minimum of 10 gallons of water per acre.

Packaging:

Sold in 20 lb bags, 100 bags per pallet.

Timing:

Fall: Apply immediately after harvest for best performance.

Spring: Apply with early herbicide application or in the termination of cover crops.

Summer: Ideal for breaking down wheat stubble.

Recommended Crops

All crop residue

Ingredients

Guaranteed Analysis 13-0-0

Total Nitrogen (N).....	13.0%
13% Water Soluble Nitrogen	
Sulfur (S).....	15.0%
15% Water Soluble Sulfur	

Derived from ammonium sulfate.

Also Contains Non-Plant Food Ingredients

Guaranteed Analysis - Soil Amending Ingredients

Microbial Content.....	10%
Bacillus amyloliquefaciens	1 x 10 ⁸ cfu/g
Bacillus licheniformis	5 x 10 ⁸ cfu/g
Bacillus megaterium	1 x 10 ⁸ cfu/g
Bacillus pumilus	2.5 x 10 ⁸ cfu/g
Phanerochaete chrysosporium	5 x 10 ⁴ cfu/g
Trichoderma harzianum	2.5 x 10 ⁴ cfu/g

2-Hydroxyl-1,2,	
3-Propanetricarboxylic Acid.....	16.0%

Total Other Ingredients..... 74.0%
